

Rahul Khote

[Operations & Coordination](#) | [AI Tools & Prompt Engineering](#) | [HR Operations](#)

Bhopal | India | +91 8989801677 | rahulkhote2003@gmail.com | <https://www.linkedin.com/in/rahul-khote-4b13a521b/>

Profile

AI and operations-focused Computer Science graduate with hands-on experience in **prompt engineering, generative AI tools, HR operations, and workflow coordination**. Skilled in designing structured prompts, AI-assisted productivity workflows, summarisation systems, and operational automation use-cases. Experienced in talent acquisition support, project coordination, and AI-enabled process optimisation. Passionate about leveraging Generative AI and Large Language Models to improve business workflows and user productivity.

Experience

Intern – Talent Acquisition (HR Trainee)

Valkyrie People Consulting | Aug 2025

- Supported end-to-end recruitment including sourcing, screening, and interview scheduling.
- Managed job postings and coordinated candidate communication across multiple roles.
- Assisted HR operations and aligned candidate profiles with client requirements.

Intern – Infrastructure & Service Operations Support

Vedang Cellular Services | May 2024 – July 2024

- Supported implementation and maintenance of cellular service infrastructure.
- Assisted senior engineers in resolving network and service issues.
- Contributed to a **15% improvement in ticket resolution speed** through coordinated support and documentation.

Intern – Project Coordination & Development (Remote)

Netlink Software | May 2024 – July 2024

- Supported consulting and operations activities by coordinating training sessions for trainees across assigned programs.
- Assisted consultants with preparation and refinement of presentation materials (PPTs) used for training and client-facing sessions.

Education

- **Vellore Institute of Technology, Bhopal** – B.Tech – Computer Science and Engineering (Core)
CGPA: 8.54 | Aug 2021-Oct 2025
- **Campion School, Bhopal** – Class XII | **81.8%** | April 2020-May 2021
- **Campion School, Bhopal** – Class X | **85%** | April 2018-May 2019

Projects

Local Charity Website (Final Year Project) | Jul 2024 – Apr 2025

- Designed and developed a responsive platform to showcase local charities.
- Tech stack: **HTML, CSS, JavaScript, React, SQL.**
- Improved transparency and usability through structured UI while working as a full-stack developer in a 3-member team.
- Designed and tested prompt templates for summarization, task automation, and operational support use-cases.

Algorithm Visualizer | Aug 2022 – Oct 2022

- Developed an educational tool to visually explain algorithm logic.
- Coordinated task allocation and timelines within a small team.
- Enhanced learning outcomes through interactive visualization.
- Designed structured prompts for summarization, research, workflow automation, and content generation use-cases using ChatGPT and Gemini.
- Built AI-assisted productivity workflows that improved task efficiency and response quality.
- Created prompt libraries for customer support, content writing, and operational workflows.
- Evaluated AI outputs and refined prompts to improve accuracy, consistency, and contextual relevance.
- Applied Generative AI tools for automation, research assistance, documentation, and business operations support.

PROMPTVAULT – AI Prompt Engineering & Workflow Automation Portfolio | May 2026

- Designed and tested prompt templates for summarization, task automation, and operational support use-cases.
- Built a structured AI prompt engineering portfolio containing workflow-focused prompts across HR, productivity, operations, research, and content use-cases.
- Designed, tested, and optimized prompts for resume analysis, workflow automation, meeting summarization, AI-assisted productivity, and business operations support.
- Applied prompt optimization techniques to improve output consistency, reduce hallucinations, and enhance response relevance using ChatGPT and Gemini AI.
- Documented prompt testing workflows including issue identification, optimization strategies, and result improvement observations for practical Generative AI use-cases.

Skills & Abilities

Technical Skills

- Prompt Engineering
- Generative AI
- Large Language Models (LLMs)
- ChatGPT
- Claude AI
- Gemini AI
- AI Workflow Automation
- Prompt Optimisation
- AI Content Generation
- AI Research

- AI-assisted Productivity
- AI Operations
- Python (Basic)
- API Fundamentals
- SQL
- MS Excel

Business & Operations Skills

- Process Documentation
- HR Operations
- Talent Acquisition
- Project Coordination
- Stakeholder Communication
- Workflow Optimization
- Reporting & Analysis

Tools

- MS Excel (Intermediate)
- Google Workspace

Certificates

- Google Prompting Essentials – Coursera
- Oracle Cloud Infrastructure – Foundations Associate (2025)
- Oracle Cloud Infrastructure – Data Science Professional (2025)
- Applied Machine Learning in Python – University of Michigan
- Oracle AI Vector Search Certified Professional
- Cloud Computing – NPTEL

Awards & Recognition

- National Karate **Bronze Medalist** (2016)
- **2nd Runner-Up** – State-Level Tennis & Badminton (2015)

Activities and Interests

- Fitness, martial arts, and competitive sports
- Theatre, swimming, and creative activities
- Exploring AI tools for productivity and operations
